Carles Domingo-Enrich

Contact Data

Phone and email:	+1 929 334 5312, cd2754@nyu.edu
Nationality:	Spanish; U.S. permanent resident (Green Card holder)
Website:	https://cdenrich.github.io

Education

May 2024 Sept 2019	PhD in **Computer Science** at the **Courant Institute of Mathematical Sciences, New York University**. Advisor: Joan Bruna. Topics of research: diffusion models, generative modeling, theory of deep learning, hypothesis testing, optimization for continuous games.
Sept 2014 - May 2019	Bachelor's degrees in **Mathematics** and **Engineering Physics** at **Universitat Politècnica de Catalunya (UPC)**, Barcelona. Student at CFIS (Interdisciplinary Higher Education Center). Final grades: 8.63/10 (Math.), 8.98/10 (Eng. Physics)

Research and Work Experience

Current Sept 2024	Senior Researcher at **Microsoft Research** New England in Cambridge, MA, working on generative AI models
Aug 2024 Oct 2022	Visiting Researcher (part-time) at **Meta FAIR Labs** in New York City, NY, working with Ricky T. Q. Chen and Brandon Amos.
May-Aug 2022	Intern at **Microsoft Research** New England in Cambridge, MA (remote), working with Lester Mackey.
May-Aug 2021	Intern at **IBM Research AI** in Yorktown Heights, NY (remote), working with Youssef Mroueh.
2020-2022	TA for the courses DS-GA 1014 Optimization and Computational Linear Algebra for Data Science (Fall 2020), and CSCI-GA 3033-079 Special Topic: Mathematics of Deep Learning (Spring 2022). TA and grader for the course DS-GA 1005 Inference and Representation (Fall 2021).
Sept '18-May '19	Student intern at NYU, Courant Institute of Mathematical Sciences
May-Aug 2018	Data scientist intern at Gauss & Neumann (SEM firm) in Barcelona
Jul-Sept 2017	Summer research intern at Nokia Bell Labs in Paris (Nokia Paris-Saclay)

TALKS

- Invited talk at Boston Diffusion Day (Harvard University). October 2025. *Test-time scaling of diffusions with flow maps.*
- Talk at Columbia Statistics Department. October 2025. *Adjoint Matching & Sampling: fine-tuning and sampling with stochastic optimal control.*

- Talk at Microsoft AI4Science BioEmu reading group. June 2025. *Adjoint Matching & Sampling: fine-tuning and sampling with stochastic optimal control*.
- Talk at Aaditya Ramdas' group at CMU. April 2025. *Cheap permutation testing*.
- Talk at the Diffusion Reading Group of Harvard University. March 2025. *Adjoint matching: fine-tuning flow and diffusion generative models with memoryless stochastic optimal control*.
- Invited talk on diffusion alignment at the MIT course *An Introduction to Flow Matching and Diffusion Models*. Jan. 2025.
- Talk at the Diffusions Seminar of UT Austin. Nov. 2024. *Adjoint matching: fine-tuning flow and diffusion generative models with memoryless stochastic optimal control*.
- Talk at Xaira Therapeutics. Oct. 2024. *Adjoint matching: fine-tuning flow and diffusion generative models with memoryless stochastic optimal control*.
- Talk at the ML Theory seminar at the Center for Computational Mathematics, Flatiron Institute. Oct. 2024. *Adjoint matching: fine-tuning flow and diffusion generative models with memoryless stochastic optimal control*.
- Talk at the NYU generative models foundations seminar. Oct. 2024. *Adjoint matching: fine-tuning flow and diffusion generative models with memoryless stochastic optimal control*.
- Talk & discussion at the Learning on Graphs & Geometry Reading Group. Sept. 2024. *Adjoint matching: fine-tuning flow and diffusion generative models with memoryless stochastic optimal control*.
- Talk at TransferLab Seminar. Sept. 2024. *Stochastic Optimal Control Matching*.
- Talk at Microsoft Research New England. March 2024. *Improving Generative Modeling and Stochastic Control by Matching Vector Fields*.
- Talk at Cornell Tech, Volodymyr Kuleshov's group. Feb. 2024. *Improving Generative Modeling and Stochastic Control by Matching Vector Fields*.
- Talk at Google Deepmind. Jan. 2024. *Stochastic Optimal Control Matching*.
- Talk at Flatiron Institute. Jan. 2024. *Improving Generative Modeling and Stochastic Control by Matching Vector Fields*.
- Talk at Kempner Institute, Harvard University. Dec. 2023. *Improving Generative Modeling and Stochastic Control by Matching Vector Fields*.
- Talk at Meta FAIR Labs. Nov. 2023. *Improving Generative Modeling and Stochastic Control by Matching Vector Fields*.
- Talk at Nvidia's Fundamental Generative AI group, Sept. 2023. *Speeding up generative modeling and distribution testing*.
- Microsoft Research New England Seminar, Feb. 2023. *Speeding up generative modeling and distribution testing*.
- Yingzhen Li's group meeting, Imperial College, July 2022. *Separation results between fixed-kernel and feature-learning probability metrics* & *Depth and Feature Learning are Provably Beneficial for Neural Network Discriminators*.
- Joan Bruna & Jason Lee's joint group meeting, June 2022. *Depth and Feature Learning are Provably Beneficial for Neural Network Discriminators*.
- IBM Research AI seminar, June 2022. *Auditing Differential Privacy in High Dimensions with the Kernel Quantum Rényi Divergence*.

- MIT - IBM Watson AI Lab invited seminar, March 2022. *Depth and Feature Learning are Provably Beneficial for Neural Network Discriminators.*
- MIT - IBM Watson AI Lab invited seminar, Nov. 2021. *Tighter sparse approximation bounds for ReLU neural networks.*
- MIT - IBM Watson AI Lab invited seminar, July 2021. *Separation results between fixed-kernel and feature-learning probability metrics.*
- Weinan E's group meeting at Princeton, April 2020. *A mean-field analysis of two-player zero-sum games.*
- Princeton PACM Graduate Student Seminar, March 2020. *A mean-field analysis of two-player zero-sum games.*

Fellowships and achievements

Oct 2021	NeurIPS 2021 Outstanding Reviewer award
Jul 2018	**La Caixa Fellowship** for postgraduate studies in North America and the Asia-Pacific region. 55 fellowships were awarded among 446 Spanish applicants. The fellowship covers tuition of the PhD program and a stipend of around $30k/year for 24 months.
Jun 2014	**First student ever to achieve a perfect score (10/10)** in the general phase of the University Entrance Examinations of Catalonia (Proves d'Accés a la Universitat - PAU). These examinations have taken place every year for more than 30 years. The general phase consists of 5 tests that all students applying for a degree in a Catalan university must take. Newspaper article (in Spanish): *http://ccaa.elpais.com/ccaa/2014/06/27/catalunya/1403862593_090989.html*
2014	Bronze medal at the 2014 Spanish Mathematical Olympiad and silver medal at the 2014 Spanish Physics Olympiad.

Mentorship

- Supervised 2 summer research interns at Microsoft Research New England (Summer 2025)
  - Yuanqi Du, PhD student at Cornell University
  - Raghav Singhal, PhD student at New York University

Organization roles

- Organizer, MSR NE Generative Modeling & Sampling Seminar (June 2025–present): https://sites.google.com/view/msrne-genai-sampling-seminar/home

Languages and computer skills

Languages: Catalan (mother tongue), Spanish (proficient), English (proficient, Cambridge English: Advanced, TOEFL 113), French (Upper intermediate, DELF B2), German (Intermediate, B1+, EOI - Official Language School of Catalonia)

Programming languages: Python, PyTorch, C++, MATLAB, OCaml, R, MySQL
